Experience

AtomBeam

July 2020 – Present
Software development intern

- Complete software development tasks to optimize data-transfer software
- Employ effective organization and communication skills to work remotely for a small startup

LightRiver Technologies

June 2019 – August 2019
Engineering intern

- Configured, tested and deployed fiber optic networking equipment with a team of engineers for clients nationwide
- Developed internal configuration scripts to automate the provisioning of equipment for large corporate customers

Top Tutoring

July 2017 – September 2017
Software development intern

- Wrote Ruby code to implement new features on the front and back end of an online tutoring webapp
- Contributed code using industry-standard best practices including Git version control, code reviews, and Kanban-style task management

Round Table Pizza

April 2016 – September 2016
Crew member (Moraga, CA)

- Used customer service, food prep, and communication skills to perform restaurant duties

Projects

ericbanisadr.com

My blog

Built a statically generated site in vanilla HTML and CSS, using [Jekyll](#) and the mobile-first principle, with emphasis on fast loading times and search engine optimization.

Service

Washington Yacht Club

July 2020 – Present
Database consultant

Ongoing maintenance and support for our club's membership database, including upgrading MySQL/PHP versions and user support. Responsible for proposing and implementing new features as needed by the club.

About

I'm a passionate programmer with a focus on product excellence. I'm quick and eager to learn and have experience in a variety of fields to back it up. I have excellent communication skills and believe working collaboratively is essential to good software development.

Education

University of Washington

2018 – present

Computer science student in the class of 2022. Relevant coursework includes data structures/parallelism, hardware basics, databases, and advanced math through linear algebra. Dean's list recognition each year.

Technologies

I have extensive experience writing code in JavaScript and Java and I am familiar with best practices for code testing, version control, code reviews, MVC architectures, and Agile development. I'm always open to learning new technologies and development processes.
