Experience

Lyft

August 2022 – Present
Software engineer

- Part of the dispatch infrastructure team, detailed description forthcoming

Lyft

June 2021 – September 2021
Software engineer intern

- Lead research, design, and implementation of a new, [Homebrew](#)-based platform for distributing development tools and software to 3,500+ engineers internally
- Contributed Python and Ruby code, provisioned infrastructure, wrote high-quality design and technical documentation
- Successful knowledge transfer led to smooth rollout after a blockage waiting for artifact storage service, platform still in use

LightRiver Technologies

June 2019 – August 2019
Engineering intern

- Configured, tested and deployed fiber optic networking equipment with a team of engineers for clients nationwide
- Developed internal configuration scripts to automate the provisioning of equipment for large corporate customers

Projects

ericbanisadr.com

My blog

Built a statically generated site in vanilla HTML and CSS, using [Jekyll](#) and the mobile-first principle, with emphasis on fast loading times and search engine optimization.

Service

Washington Yacht Club

July 2020 – Present
Database consultant

Ongoing maintenance and support for our club's membership database, including upgrading MySQL/PHP versions and user support. Responsible for proposing and implementing new features as needed by the club.

About

I believe it's important to always be growing and improving both technically and as a communicator. I'm an avid reader of technical blogs and I'm quick and eager to learn. I have excellent communication skills and believe working collaboratively is essential to good software development.

Education

University of Washington
2018 – 2022

Bachelor of Science degree in Computer Science received June 2022.

Relevant coursework included data structures and parallelism, hardware basics, databases, and advanced math including linear and modern algebra.

Technologies

I have extensive experience writing code in JavaScript, Java, and Python and I am familiar with best practices for code testing, version control, code reviews, MVC architectures, and Agile development. I'm always open to learning new technologies and development processes.
